

BRIAN AGWORA OMBATI

Junior Data Scientist

brayoombati046@gmail.com | +254791702158 | [linkedin.com/in/yourprofile](https://www.linkedin.com/in/yourprofile) | github.com/Agwora | Nairobi, Kenya

SUMMARY

Data Scientist skilled in end-to-end ML pipelines, financial risk modelling (EVT / Block Maxima), and Docker-containerised deployments. Combines rigorous statistical methods with commercial problem-solving across fintech, climate, and media analytics.

TECHNICAL SKILLS

Languages	Python, SQL, R
ML & Stats	Scikit-learn, XGBoost, Statsmodels, EVT, Hypothesis Testing, Econometrics
Data Eng.	Pandas, NumPy, time-series & spatial feature engineering, rolling statistics
DevOps	Docker, Git / GitHub, Linux
Finance	Credit risk modelling, Block Maxima, tail-risk simulation, volatility benchmarking

TECHNICAL PROJECTS

Full-Scale Meteorological Predictive AI System [\[GitHub\]](#)

- End-to-end Python forecasting pipeline with time-series lagging, spatial imputation, and rolling-window feature engineering.
- Containerised full application stack in Docker for cross-platform cloud deployment — production-grade workflow beyond notebook-level data science.

Loan Default Prediction & Risk Architecture [\[GitHub\]](#)

- Supervised ML credit-scoring model (Logistic Regression, Gradient Boosting) assessing borrower default probability on consumer financial data.
- Integrated Extreme Value Theory (EVT) via Block Maxima to model tail-risk; benchmarked S&P 500 vs Kenyan Sovereign Bond volatility to quantify cross-market risk divergence.

Earth Carrying Capacity Simulation [\[GitHub\]](#)

- Multi-parameter simulation consolidating arable land, water scarcity, demographic trajectories, and energy output into an interconnected resource-limit model.

Competitive Rivalry Modelling — Entertainment Ecosystem [\[GitHub\]](#)

- Econometric analysis applying hypothesis testing and game-theory logic to isolate drivers of user churn when rival streaming platforms launch competing content.

EDUCATION

BSc Applied Statistics— Kisii University, Kisii, Kenya 40200.

Relevant coursework: Statistics, Econometrics, Machine Learning, Financial Mathematics, Database Systems
